## 1201 THIRD TENANT AED SURVEY

In partnership with PulsePoint Foundation, Harborview, and Medic One, the University of Washington has tasked several research assistants with identifying locations of privately and publically available AEDs in the Greater Seattle area to add to the PulsePoint Foundation database. This database is available to 9-1-1 dispatchers allowing them to direct callers to the nearest AED in the event of an emergency. This quick response increases the "chain of survival" by improving bystander response to cardiac arrest victims and increasing the chance that lifesaving steps will be taken prior to the arrival of emergency medical services. If your office has an AED please consider taking some time to complete the survey by clicking here: [1201 Third Tenant AED Survey](#). More information on PulsePoint Foundation is available here: <http://www.pulsepoint.org/>
